Aggarwal Steels Website: Structure and Build Plan

Breakdown of https://agrawal-steels.vercel.app/ covering pages, home page sections, card counts, View All buttons, and fixes to make while building.

1. Pages (6 + 1 PDF)

#	Page	Purpose
1	**Home** `/`	Overview of everything, with a short version of each section
2	**Products** `/products`	Full catalogue, all 17 products
3	**Manufacturing** `/manufacturing`	Machinery and the powder coating plant
4	**About Us** `/about`	Story, mission, vision, journey, locations
5	**Clients** `/clients`	All client logos and projects
6	**Contact** `/contact`	Quote form, addresses, WhatsApp
–	**Catalogue 2026 PDF**	Download button in the header and footer

The header has all 6 pages as menu links, plus 3 buttons: **Catalogue 2026**, **Contact** and **Instant Quote**. There is also a top announcement bar: "Express Dispatch – Material dispatched within 24 hours".

2. Home page sections (in order)

1. **Hero:** headline "Building Stronger Industries Together", 2 buttons (*Explore Catalog* and *In-House Machinery*), and a list of 5 core divisions.
2. **At a Glance stats:** 4 counters (₹200+ Cr turnover, 250+ workforce, 11+ years, 5 operating units).
3. **Scrolling ticker:** 6 trust points (SAIL partner, 24-hour dispatch, MTC, etc.) that repeat in a loop.

4. **Product Portfolio: 17 cards**, plus filter tabs (All, Steel Supply, Manufactured Systems, Structural Steel, Plates & Coils, Storage Solutions, Custom Fabrication). Each card has an image, tag, title, spec, description, brand badges and a **Request Quotation** button.
5. **In-House Machinery: 6 cards** (3kW Laser, CNC Bending, 520ft Powder Coating, Roll Forming & Press, Warehouse Storage, SS Kitchen). Each has an **Enquire Machine Specs & RFQ** button.
6. **Steel Sourcing Partners: 6 logos** (SAIL, Tata, JSPL, AM/NS, Apollo, Jindal SS).
7. **Clients: 11 logo cards** (Amazon, Maruti, M3M, KEI, AFCONS, etc.).
8. **About / Corporate Overview:** text, 4 small highlight boxes, founder photo and quote, mission and vision.
9. **Why Choose Us: 6 cards**.
10. **Journey:** turnover bar chart with 5 years (₹52 Cr to ₹200+ Cr) and a Majestic AR Technology box.
11. **Manufacturing Units & Network: 5 location cards** plus **5 depot cities**.
12. **Procure in 3 Steps: 3 step cards** (Enquire, Quotation, Dispatch).
13. **Quote Form:** fields for name, phone, email, product dropdown (16 options) and message, plus a contact details box.
14. **Footer:** logo, catalogue button, 3 link columns, copyright.

3. Where View All buttons should go

The live site only has one real "View All" link, in the footer ("View All Certified Products →"). For a cleaner Home page, use this plan:

Home section	Show on Home	Button	Goes to
Products	**6 cards** (best sellers: TMT, HR Plates, Beams, Pipes, Pallet Racks, Mezzanine)	**View All Products**	`/products` (all 17)
Machinery	**3 cards** (Laser, Bending, Powder Coating)	**View All Machinery**	`/manufacturing` (all 6)
Clients	**6 logos**	**View All Clients**	`/clients` (all 11)

Home section	Show on Home	Button	Goes to
Why Choose Us	6 cards	none	–
Locations	5 cards	**View All Locations**	`/about` or `/contact`
About	short text	**Read Our Story**	`/about`
Quote form	short form	–	`/contact` has the full one

Everything else stays complete on its own page.

4. What goes on each inner page

- **Products:** all 17 cards, with the filter tabs. Each card should have its own anchor, such as `#hr-plates` and `#mezzanine-floors`, because the footer links already use them.
- **Manufacturing:** all 6 machines, the 520ft plant details, and a Majestic AR Technology intro.
- **About Us:** company overview, founder, mission and vision, the Why Choose Us cards, the journey chart, and the locations.
- **Clients:** all 11 logos, the 6 partner mills, and optionally a testimonials section.
- **Contact:** the quote form, 3 addresses, phone numbers, emails, working hours and the WhatsApp button.

5. Things to fix while building

1. **Images are reused.** For example, `storage_racking.jpeg` appears on 6 different cards. Each product should get its own photo.
2. **Same machinery content appears twice** (Home and Manufacturing). Using the shorter version on Home fixes that.
3. **Spelling:** the URL says "agrawal" but the brand is "Aggarwal". Keep it consistent everywhere.

4. **Product count mismatch:** the form dropdown has 16 items but there are 17 cards, so make them match.
5. **Counters show 0** in the page text because they animate on scroll. Make sure the final numbers appear if JavaScript is slow.
6. **Two email addresses** (md@majesticar.com and info@majesticar.in) with different domains look inconsistent. Pick one main address.

6. Next steps

Decide the tech stack (plain HTML, Next.js, or other), then build in this order: reusable card component, Home page, Products page, Manufacturing, About, Clients, Contact.
