MAJESTIC AR TECHNOLOGY PVT LTD

Where innovation meets precision

ISO 9001:2015

MAKE IN INDIA

- Racking System & Storage Solution
- Sheet Metal Components
- Trolly's (Customised)

- Railway Products
- Conveyor System
- Raw Material Supply (PAN India) M.S. & S.S.
- Assembly Line & Work Station
- Mobile Compactors

MAJESTIC AR TECHNOLOGY PVT LTD

Where innovation meets precision

KNOW YOUR MANAGEMENT

AAKASH GOYAL

Director & Co-founder

7300070778

We are delighted to welcome Aakash, a renowned businessman with over 10 years of experience in the steel industry, to our team. His expertise in quality raw material procurement and astute business acumen are invaluable assets. Aakash has successfully managed multiple businesses within the industry, and his strong vision has been instrumental in our journey, making him a cornerstone of our success.

RAHUL POPLI

Director & Co-founder

9873621215

We are pleased to announce the addition of Rahul to our team, a distinguished businessman with over 15 years of experience in the manufacturing industry. Renowned for his adeptness in resolving intricate issues with technical expertise, Rahul is well-equipped to address every design requirement. His extensive experience and problem-solving skills make him a valuable asset to our organization.

200 Crore^{+} Turn Over

250^{+} Employees

21^{+} Yrs of Manufacturing Experience

4^{+} Manufacturing Units

2,25,000 Sq. Ft. Covered Area

3^{+} Trading Units (M.S. & S.S. PAN India)

Since its establishment, **Majestic AR Group of Companies** in 2003 has always been committed to providing the highest quality material handling and automation solutions and precision sheet metal components to a wide range of industries.

Based out of IMT Manesar, Bhiwadi & Bawal Majestic AR Technology Pvt ltd. has 2,25,000 sqft. + of manufacturing area and complete in-house infrastructure of machineries and Design, Quality , R&D and production team.

We are currently supplying and servicing customer across PAN India and exporting to more than 4 countries++.

WHY MAJESTIC AR TECHNOLOGY?

- In House **Design & R & D Team**
- In House **Production & Quality Team**
- 24 Hour Dispatch of **Trading Items**
- Strong **After Sales Service**

VISION & PHILOSOPHY

MISSION

Committed to innovative development of intelligent manufacturing

VISION

Be the top solution provider of Automation solutions and precision sheet metal components

SLOGAN

Quality Products with price competitiveness

VALUE

Pursuit of Excellence, Integrity and Honesty, Realistic and Innovative, Customer First, Team Spirit, Shared Value

VALUES

Adhering to excellence and integrity, we are gathered together under the spirit of practice and innovation, the concept of customer first and the best teamwork spirit, co-creating the future shared value, moving towards our common dream, and striving to be a globally leading provider of diverse manufacturing solutions.

LIGHT DUTY SHELVING

Long Span Shelving (LSS) is a product used for storing light and medium heavy goods, ranging from 150 kgs to 600 kgs. Ideal for products longer than 1300mm and load per level greater than 200kgs. Thus the product fits in the intermediate category between the Universal Storage System (USS) and Pallet Storage System (PSS). Euro Pallets (1000 x 800mm) can be stored under the bottom level when the span is 2300mm.

Long span shelving can be used to store virtually anything, like
Crates, Boxes, Rolls, Files, Packets, Corrugated boxes, Paint cans, The list can go on almost endlessly, for products between the range of applicable size and weight

A versatile shelving for storing long and odd sized components

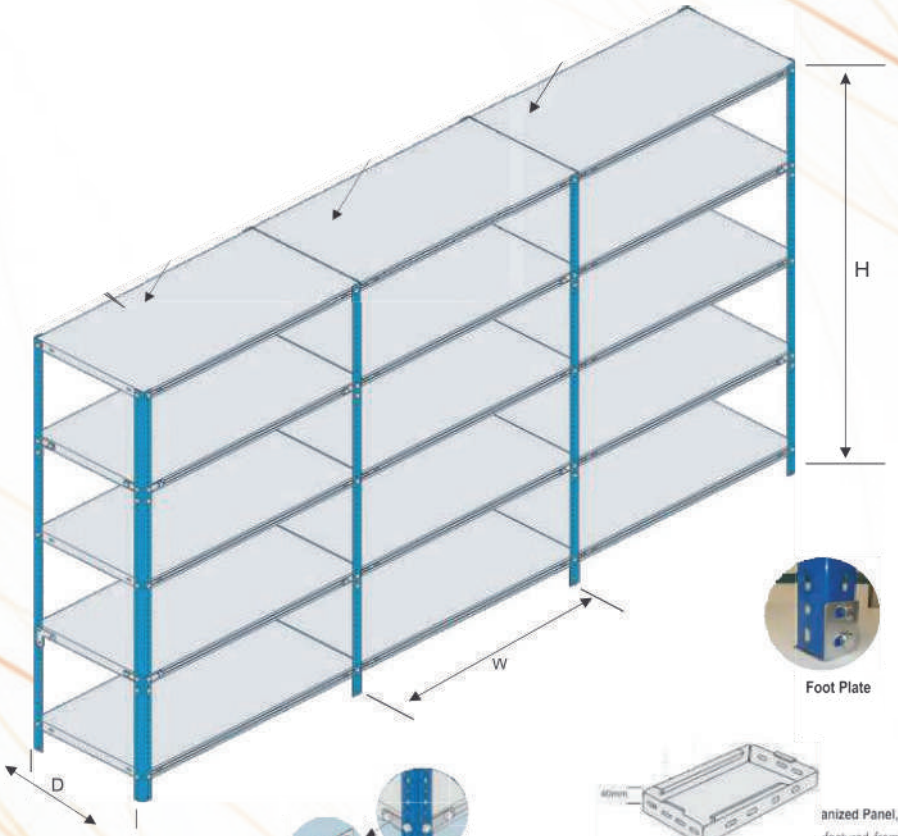

SLOTTED ANGLE RACKING

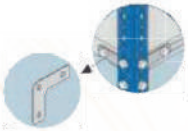

What is a Slotted angle rack?

A Slotted Angle Rack is a type of shelving unit made up of vertical and horizontal metal angles with slots that can be adjusted to different heights. The rack is designed to be assembled without the need for bolts or screws, and can be easily customized to fit a variety of storage needs

USS is ideal for Uniformly Distributed Loads (UDL) up to 250 kg per level. A single starter bay of 4 levels can take up to 1000 kg (UDL). For loads from 300 kg to 600 kgs per level, LSS is recommended, and for loads from 500 kgs to 3000 kgs, PSS is suitable

Foot Plate

Galvanized Corner Plate
suited for all system lengths and depths, fixing material included

anized Panel, 40 mm. high
ufactured from steel sheet
accepts upto 150 kgs. uniformly
distributed load (U.D.L.) due to
Unique Ten Bend Construction

PALLET STORAGE

Pallet rack is a material handling storage aid system designed to store materials on pallets (or “skids”). Although there are many varieties of pallet racking, all types allow for the storage of palletized materials in horizontal rows with multiple levels. Forklift trucks are usually required to place the loaded pallets onto the racks for storage. Since the Second World War, pallet racks have become a ubiquitous element of most modern warehouses, manufacturing facilities, retail centers, and other storage and distribution facilities. All types of pallet racking increase storage density of the stored goods. Costs associated with the racking increases with increasing storage densi

A pallet is the structural foundation of a unit load, which allows handling and storage efficiencies. Goods in shipping containers are often placed on a pallet secured with strapping, stretch wrap or shrink wrap and shipped. In addition, pallet collars can be used to support and protect items shipped and stored on pallets.

PALLET STORAGE

The most popular and economical system for pallet storage. Suitable for any type of pallet size and weight to optimize storage This system can be designed to be serviced with any type of MHE starting from hand pallet trucks at floor level to electric stackers, reach trucks,forklift trucks VNA forklift trucks etc.

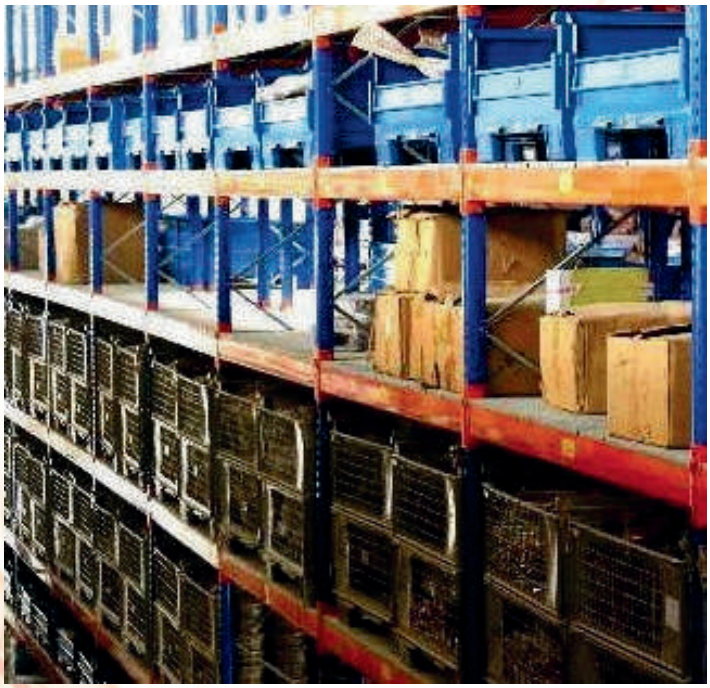

Racking pallet storage system

Racking pallet storage with decking panels

HEAVY DUTY STORAGE SYSTEM WITH DECKING PANEL

Heavy Duty Rack is a warehouse racking system designed to hold and store heavy or bulky items such as large machinery, industrial equipment, and other loads that require high-capacity storage

MEZZANINE FLOOR AND MULTI TIER RACKS

A mezzanine is an intermediate floor (or floors) in a building which is open to the floor below. It is placed halfway (mezzo means 'half' in Italian) up the wall on a floor which has a ceiling at least twice as high as a floor with minimum height. A mezzanine does not count as one of the floors in a building, and generally does not count in determining maximum floor space. The International Building Code permits a mezzanine to have as much as one-third of the floor space of the floor below. Local building codes may vary somewhat from this standard. A space may have more than one mezzanine, as long as the sum total of floor space of all the mezzanines is not greater than one-third the floor space of the complete floor below. Mezzanines help to make a high-ceilinged space feel more personal and less vast, and can create additional floor space. Mezzanines, however, may have lower-than-normal ceilings due to their location. The term "mezzanine" does not imply any particular function; mezzanines can be used for a wide array of purposes. Mezzanines are commonly used in modern architecture, which places a heavy emphasis on light and space.
